PROFILE

Frontend engineer with 8+ years of experience. I started freelancing while still at school, worked on-site in Berlin, and since 2023 I've been at Geckosoft, where I lead the frontend team. Most of my work is in React and Angular with TypeScript. At Geckosoft I've shipped more than 14 projects, and I look after architecture, code review and mentoring. Outside working hours I build PartyUp, management software for nightclubs that five venues use today.

EXPERIENCE

PartyUp — Founder Jan 2025 — Present

Management software for nightclubs: door, VIP tables, PR lists, bar, cash registers and inventory in one system. Five clubs use it today, and more than €1M has gone through the events it runs. I design the product and build it, from the interface to what goes live, outside my full-time job.

Read the case study → gianmarcodelfreo.com/partyup

Geckosoft — Frontend Engineer · Team Lead Feb 2023 — Present · Pisa · Hybrid

More than 14 Angular and React projects for clients in different industries. I lead the frontend team on architecture, code review and mentoring, in an Agile/Scrum setup.

Data Spree — Frontend Web Developer & Web Designer Sep 2022 — Dec 2022 · Berlin, Germany · On-site

An AI company in Berlin. I designed and built the interface of an app fed by a webcam: the images went through AI models and a backend, and the frontend let users work with what was detected and correct the defects the AI had flagged. Built with Vue.js and Tailwind.

Freelance — Frontend Web Developer Jul 2018 — Mar 2022

I started freelancing while still at school. More than 50 projects for companies, professionals and local businesses, mostly landing pages and SaaS apps built with Next.js and Vite, each handled end to end: requirements, going live and support.

Wezard — Frontend Web Developer Jul 2021 — Oct 2021 · Turin, Italy

I worked on interfaces for a large e-commerce site and built features for the WeStudents app, with React and React Native.

SKILLS

Languages	TypeScript, JavaScript
Frameworks	React.js, Angular, React Native, Expo, Next.js, Vue.js
Styling	Tailwind, Bootstrap, Responsive design
Design	Figma, Affinity
Tooling	Git, GitHub, Docker, Playwright
